

Plant vs. Animal Cells

1. How do the size of the two different cells compare to each other?
2. How do the shape of the two different cells compare to each other?
3. In which cell were the most organelles visible?
4. For each of the following organelles, label whether you saw it in Plant (P), Animal (A), Both (B) or Neither (N)
 - Cell Membrane _____
 - Cell Wall _____
 - Vacuole _____
 - Chloroplast _____
 - Nucleus _____
 - Flagella _____
 - Cilia _____

Prokaryotic vs. Eukaryotic Cells

1. How do the size of the two different cells compare to each other?
2. How do the shape of the two different cells compare to each other?
3. Were you able to see any organelles in the prokaryotic cell?
4. Were you able to see any organelles in the eukaryotic cell?
